DETAILED ACTION

Information Disclosure Statement

1. The information disclosure statement filed 9/8/05 has been considered.

Drawings

2. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the servo data whose inclination is smaller than that of the data recorded on the data areas is recorded on the servo areas in the data tracks included in the inner radius as set forth in claims 4 and 9 must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner,

the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the first paragraph of 35 U.S.C. 112:

> The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

4. Claims 4 and 9 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. Claims 4 and 9 indicate that the servo data has an inclination that is smaller than the data recorded in the data areas in the tracks included in the "inner radius". Examiner can only find support in the specification for the smaller inclination angle of the servo data at the outer radius of the disk , not the inner radius as set forth.

5. Claim 1and 6 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Claim 1 sets forth a disk drive which by amendment includes a servo head to write the servo data to the medium. The written specification appears to indicate that the servo data is written using a STW (servo track writer), which is distinct from the disk drive. This newly set forth feature is deemed to be

new matter, objected to under 35 U.S.C. 132, and must be cancelled. Claim 6 inherits the language of claim 1.

6. The following is a quotation of the second paragraph of 35 U.S.C. 112:

> The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

7. Claims 2-4 are rejected under 35 U.S.C. 112, second paragraph, as being incomplete for omitting essential elements, such omission amounting to a gap between the elements. See MPEP § 2172.01. The omitted elements are: the structure used to write the servo data, i.e. is the servo data prewritten by a STW (servo track writer)? Claim 13 inhereits the language of claim 2.

8. Claims 1 and 11 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. It is not clear from claims 1 and 11 when or at what portion of the disk the inclination angle of the servo data becomes smaller than the data recorded in the data areas.

Response to Arguments

9. Applicants arguments made 8/2/05 in view of the amended claims are persuasive in relation to the previous rejections. However, upon further consideration a new ground of rejection has been made.

Allowable Subject Matter

10. Claims 2, 13/2, 3, 11 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

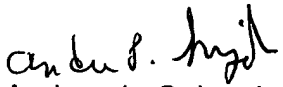

11. Claim 8 is allowed.

Claims 1-4, 6, 8, 9, 11-13 are allowable over the **art of record** for reasons of record.
